Countries - Key Export Markets:

Germany, United Kingdom, Switzerland, Sweden

Certification (ISO 9000, VDA etc.)

ISO 9001

Our company is already involved in co-operation with foreign partners:

YES

NO

We are already co-operating with these foreign partners in following activities or projects:

Volkswagen for aluminium casting machines

Our key products/services or activities:

Large and heavy machining for machine, oven and press manufacturers

Our technological equipment and manufacturing/services capacities:

3 gantry mills, 12 boring mills, 2 gantry grinding machines up to 25 m and 100 tons

Our special skills and facilities:

Stainless steel, aluminium, hydraulics, high-temperature painting, precision assembly, tool and die casting form

References - key clients:

Volkswagen, Daimler, Audi, BMW, Man, Volvo, Huisman, Honsel, Georg Fischer, Tos Varnsdorf, ABB, Siemens

We consider ourselves to be ideal partner for co-operation because:

We are flexible, fast and we have high quality and moderate prices

Annual Turnover

3 200 000 EUR

% of which Exports:

30%

Countries - Key Export Markets:

Poland, Germany, Austria

Certification (ISO 9000, VDA etc.)

ISO 9001 - surface treatment div. ISO TS 16949 + ISO 14001 - metal production

Our company is already involved in co-operation with foreign partners:

YES

NO

We are already co-operating with these foreign partners in following activities or projects:

La Squadra, Somac, Rittal - CNC processing of metal parts, GT Poland - KTL painting

Our key products/services or activities:

The LAKUM-KTL company was established in 1998 in Frydlant nad Ostravici (near the town of Ostrava in the Czech Republic). The company aim is to produce metal products from steel sheets by stamping (mainly for automotive industry), CNC punching, CNC bending on bending centre Salvagnini, welding, riveting.
The second company division provides surface treatments – painting (powder painting, cataphoresis) and zinc-galvanizing.
The third company division is for assembly of company products.
We produce pressed parts for automotive and electrotechnical industry, metal furniture parts and kitchen fume chambers, metal enclosures, heating boiler cases, etc. We are able to produce products according to customer requests including surface treatments, final assembly, packing and delivery.

Our technological equipment and manufacturing/services capacities:

CNC punching machines, CNC bending centre, CNC pressbrakes, mechanical presses from 20 to 315 ton power, cataphoretic paint line, zinc galvanizing line, powder painting line. Average free capacity is 40 %.

Our special skills and facilities:

CNC punching, design of products and processes, cataphoretic paint line. Big advantage of LAKUM-KTL is the possibility to assist and help with part and process design – to make first sample of part by temporary technology (that saves tooling costs and time) – to assure mass production.

References - key clients:

Our main customer is Visteon (car's lights pressed parts and holders), La Squadra (steel boxes), Viadrus (boilers), ZPA Trutnov (electrical equipment), Pollmann, TPV Tadis, Tatra, KSR (cataphoresis painting), etc..

We consider ourselves to be ideal partner for co-operation because:

We can produce complete product from stamping, bending to surface treatment, assembly and packaging. We can suggest the best way, how to produce different products and safe costs by this way.

Our company is already involved in co-operation with foreign partners:

YES NO

We are already co-operating with these foreign partners in following activities or projects:

Gearbox production for David Brown a Textron Company and TATRA, solid parts machining for Hagglunds, Lenze, Festo and many others, engineering and textile machines production for Rieter Switzerland

Our key products/services or activities:

Rotary parts - shafts, pulleys and flanches: turning work, CNC turning, grinding, high-frequency hardening, balancing. Surface finish - hardening, hard nickel, coating, blackening, phosphatizing, painting. Solid parts machining: milling, drilling, threading, surface finish. Sheet metal parts - lasercutting, forming and folding, MAG/WIG welding, point welding, surfacing, powder coating, galvanizing. Assembling. Gearbox production. Engineering.

Our technological equipment and manufacturing/services capacities:

Horizontal machining centers - product size: 40x40x40 to 800x800x720 mm. Vertical machining centers - product size: up to 3240x750x870 mm. Lathes and turning centers - product size: diameter 10-600 mm, lenght up to 2000 mm. Sheet metal processing: Laser cutter 3 kW, 1500x3000 mm, press brakes up to 2300 kN, powder coating.

Our special skills and facilities:

Rieter CZ, Zamberk has high level of organization with certified quality system, disposes of high technology and provides great customer support on international background. It has 40 years experience in engineering, machining and assembling. The company is a leading internal supplier to Rieter industrial group based in Switzerland - supplier to the textile industries.

References - key clients:

Rieter Winterthur, Rieter Ingolstadt, TATRA, Union Pump, TEXTRON, Swisstex, Suessen, FESTO, LENZE

We consider ourselves to be ideal partner for co-operation because:

We provide custom-tailored solutions in engineering, machining, sheet-metal production and assembly. Our advantages are: high quality, good price and delivery time. Our customers are satisfied with our supplies.

NO

We are already co-operating with these foreign partners in following activities or projects:

Euroforge, Mercedes, Forscher, ČKD, Zbrojovka ZTM, Remak - production and delivery of machinery parts for automotive, textile and common industry.

Our key products/services or activities:

CNC machining - milling, turning, drilling. Forged pieces 0,5 - 15 kg. Gear cases. Parts for automotive and textile industry. Textile - weaving machines for technical, glass, basalt, hybrid and other fabrics. Water treatment and purification plants.

Our technological equipment and manufacturing/services capacities:

CNC machines, professional personnel

Our special skills and facilities:

Experienced staff, high level CNC machining centres, forge press 1500 to 2000 tonnes

References - key clients:

Automotive, textile industry, machinery.

We consider ourselves to be ideal partner for co-operation because:

Because we know what the client is expecting.

Czech Manufacturer Profile - Metapro

Company Name:

Unitherm, s.r.o.

Company No.:

ZIP Code:

CZ-466 04

City:

Jablonec nad Nisou

Street:

Vedlejší

Number

25, č.p.88

Telephone:

++420 483.306.350

Fax:

++420 483.384.471

E-mail:

bahnikova@unitherm.cz

www:

www.unitherm.cz

Capital Issued:

1 088 461 EUR

No. of Employees:

120

No. of Branches:

3

Annual Turnover

6 384 thous. EUR

% of which Exports:

80%

Countries - Key Export Markets:

Germany, Switzerland, Italy, Slovakia, Denmark, Sweden, USA, Hungary, France

Certification (ISO 9000, VDA etc.)

EN ISO 9001:2000; EN ISO 14001:2004

Our company is already involved in co-operation with foreign partners:

YES

NO

We are already co-operating with these foreign partners in following activities or projects:

Tyco Electronics - Energy Division - Axicom - composite station post insulators ; Nissens Denmark - motor cover part ; Busch Produktion + Ateliers Busch - flanges ; Abus Kran Systeme - crane system ; Juli Motorenwerk - manipulation technology... etc.

Our key products/services or activities:

Sand Foundry:
Production of models of several types of timber or epoxide, production of core boxes, production of cores of mixture of silica sand and water glass, using the CT method (by carbon dioxide cores hardening), manually or by injecting.
Forming technology – manual shaping under crane, machine moulding or pulse moulding.
During 2008 design works were commenced on expansion of the sand foundry. This expansion was completed in IV.Q 2008. New machine forming workplace allows foundry to cast even bulk castings (1000x1000x300/300 mm, up to 200kg).
Die Foundry:
Moulds production–preparation of drawing documentation by our designer team, the production of moulds in cooperation.
Casting technology – gravitational (casting machines CGU and CGH, separate hydraulic-controlled stands, weight of castings - 1-20kg), low-pressure (casting machines CNS 10.23, weight of castings - 1-40kg).
Machining shop:
Construction and production of tooling in own toolshed. Machining - mainly aluminium castings, but also alloy and steel.

Our technological equipment and manufacturing/services capacities:

Foundry - see above ; Machining shop - Deckel DMC 80U, Chiron FZ 12 WM, Chiron FZ 18 WM, FSS 80 CNC, FS 50 CNC, FGS 25/32 CNC, FGSQ 32 CNC B, Mazak SQT 200M, Binns-berry CNC

Our special skills and facilities:

When the casting is cast, such operations as trimming, grinding and shot blasting are performed and, if the customer requests so, also additional operations, such as heat treatment, machining, impregnation, varnishing and semi-assemblies.

References - key clients:

Busch Produktions, Abus Kran Systeme, Juli Motorenwerk, Diets, Tyco Electronics, Ateliers Busch, Nissens Denmark, GSL, Rieter, s.r.o., GE Transport, GE Hungary, Jacobsen, Sargent Metal, Gravitass... etc.

We consider ourselves to be ideal partner for co-operation because:

We have many year's standing experience in foundry and machining production in all kind of industry.

Our company is already involved in co-operation with foreign partners:

YES

NO

We are already co-operating with these foreign partners in following activities or projects:

Components for metallurgy industry, components for firms which produce plastic materials and wood crushers, welding, cutting, punching etc. machines producers...

Our key products/services or activities:

Welded constructions production, engineering, special rolled sections, centrifugal casts (roll shape), tools and molds with CVD and PA CVD coatings ...

Our technological equipment and manufacturing/services capacities:

Welding and machine plant, section mill, metal foundry (centrifugal), coating centre

Our special skills and facilities:

CNC machining, own laboratory and testing

References - key clients:

Paul Wurth, GVA Krefeld, Salvagnini, Siemens VAI, SMS Siemag, ArcelorMittal, etc....

We consider ourselves to be ideal partner for co-operation because:

We are very flexible and price advantageous.
